

## MONTGOMERY® LARYNGEAL STENT

### DESCRIPTION:

The **Montgomery® Laryngeal Stent** is a molded silicone prosthesis designed to conform to the normal endolaryngeal surface. The stent is constructed of radiopaque implant grade silicone that is firm enough to support the endolarynx postoperatively, yet is soft and flexible enough to ensure a conforming fit while minimizing injury to soft tissues.

The stent may be utilized as a direct support for intralaryngeal mucosal or dermal grafts to denuded areas of the endolarynx. Each Montgomery® Laryngeal Stent includes two silicone suture buttons to support the stent externally.

### INDICATIONS FOR USE:

For the prevention and treatment of laryngeal stenosis when the glottic stenosis involves the midglottis, posterior glottis, supraglottis, and subglottis, singularly or in combination.

### SUPPLIED:

Sterile, 1 stent, 2 suture buttons per carton

### PRODUCT CODES:

<b>323010</b>	<b>CHILD STENT</b>
<b>323020</b>	<b>SMALL ADULT STENT</b>
<b>323025</b>	<b>MEDIUM ADULT STENT</b>
