

## NASAL SEPTAL BUTTON

### DESCRIPTION:

The **Nasal Septal Button** is designed for non-surgical closure of septal perforations. The device is constructed using soft silicone and can be trimmed at the time of placement. Studies have shown that use of a nasal septal button increases nasal respiration while decreasing symptoms of nasal perforations which include epistaxis and crusting. The button features two 3.2 cm diameter flanges connected by a central 7mm diameter post.

### INDICATIONS FOR USE:

For non-surgical closure of nasal perforations.

### SUPPLIED:

Sterile, 1 button per carton

### PRODUCT CODE:

**60-101      NASAL SEPTAL BUTTON**

### FEATURES

- Soft implant grade silicone.
- Can be trimmed prior to insertion.
